VILLIAGE OF HOMEWOOD HOMEWOOD, IL

AFTER

When the Village of Homewood upgraded their downtown pedestrian lighting, they decided to replace the older 50w HPS fixtures. ANP HighPro™ LED technology was available immediately in the decorative chimney luminaire specified for the project fixture, so the entire update took just six weeks from design to installation.

P0117LD4NT550K-41
with Dual Banner Arms and Signs

Job History:

Public Works Engineer Bill McClure worked with ANP to analyze the return on investment of LED versus metal halide. The City of Bakersfield had a substantial savings in electrical conductor costs and achieved a cost-recovery period of just over 19 months. The project qualified for a Pacific Gas and Electric rebate and received approval from The DesignLights Consortium®, (which promotes high quality LED fixtures). Energy efficiency was achieved with ANP HighPro LED™ solution without sacrificing the original product match specifications.

CITY OF LOS ANGELES

Teams with
ANP Lighting
for Bridge Renovation

City of Los Angeles
1st Street Bridge
Custom Fixtures

Job History:

The City of Los Angeles looked to ANP to fabricate a custom period lantern and large scale bracketed arm for the 1st Street Bridge modernizing project. Sketches were provided and our engineering team and in-house foundry created this distinctive, proprietary Lantern and Post Mount Arm to match the historic architecture of the bridge. The heavy duty cast aluminum constructed luminaire works seamlessly with the massive bracketed arm as well as a pendant mount. This custom luminaire has Type 5 optics, white acrylic lens and tool-less entry. The committed partnership between the City of Los Angeles and our qualified manufacturing and engineering departments made this fixture and mount both an aesthetic and performance fit for this monumental project.

LED Bollards

The City of Memphis and Liberty Bowl Design Group came to ANP Lighting with a sketch. They needed 300 bollards that were energy efficient, held a concealed GFI, and designed to integrate with other products already specified on the project. We designed and delivered 300 LED energy efficient bollards, on time, and in budget, with the durability and aesthetic worthy of the tailgating season.
